What we present in our poster

- Framework for evaluation
- Focus on CO\textsubscript{2} emissions and Health impacts due to PM\textsubscript{2.5} concentration
- Construction of policy packages for the case cities
- Scenarios for Delhi, Mumbai and Bangalore
- Comparison of CO\textsubscript{2} & PM\textsubscript{2.5} emissions for the 3 case cities
- Mortalities due to PM\textsubscript{2.5} concentrations for the 3 case cities
- Electric mobility scenarios under different energy mix assumptions
- CO\textsubscript{2} emissions and health impacts under electric mobility scenarios
- Conclusions
